PRICING STUDY · Q4 FY26

Where is PVR INOX's growth coming from, and where is the headroom?

Ticket price, food spend and footfalls

Source: PVR INOX Q4 FY26 results as reported by the press. Student analysis, not investment advice.

In Q4 FY26, 94% of the growth in revenue per audience came from price and spend, not more viewers

Footfalls

+1.6%

30.5 mn to 31.0 mn

Average ticket price

+22%

Rs 258 to Rs 315

F&B spend per head

+32%

Rs 125 to Rs 165

Occupancy rose from 20.5% to 23.9%, still low, so seats remain the unused asset.

Q4 FY25 ATP and SPH derived from reported YoY growth. Source: PVR INOX Q4 FY26 results (11 May 2026) via Business Standard.

Price and food spend added about Rs 300 Cr; extra footfalls added about Rs 19 Cr

Footfall effect	19	6%
Ticket price (ATP) effect	177	55%
F&B spend per head effect	124	39%
Total gross ticket + F&B value	320	100%

Caution: the company credits a blockbuster release for the quarter, so this mix may not repeat.

Method: footfall change x old (ATP + SPH); price changes x new footfalls. Source: PVR_INOX_Pricing_Model.xlsx.

A Rs 10 ticket rise loses money if footfalls fall over 2%; a food push adds about Rs 116 Cr

A. ATP +Rs 10, footfalls -3%

-Rs 35 Cr

Contribution, -1.0%

B. F&B spend +8%

+Rs 116 Cr

Contribution, +3.4%

C. Footfalls +3%

+Rs 102 Cr

Contribution, +3.0%

Base: FY26, 150 mn footfalls, ATP Rs 280, SPH Rs 147.

Assumptions, not PVR data: 45% of net box office goes to distributors; F&B cost of goods 30%; -3% footfall response to price. All tested in the Excel model.

Recommendation: grow food spend and footfalls before raising ticket prices further

1. **Push F&B.** Combos and upsell keep audience intact and keep more of each rupee than ticket revenue.
2. **Fill empty seats.** Occupancy is 23.9%; programming and marketing lift footfalls at no price risk.
3. **Raise ATP selectively.** Q4 pricing gains were blockbuster-led, so test by screen type and show time.

Limits: ATP and SPH appear to be quoted gross of tax; cost splits are assumptions; one quarter of data.
